Social or environmental impact

Sectors
Aligned to the SDGs

Ticket size
€50K – €1M

Based in Madrid, Fondo Bolsa Social is an impact investing fund that provides equity capital to support growth of young companies working to generate a positive and measurable social and environmental impact. We have raised 10 million euros and continue fundraising with a targeted fund size of 20-25 million euros.

Fondo Bolsa Social was jointly launched in early 2020 by La Bolsa Social, Spain's first equity crowdfunding platform for social businesses approved by the capital market regulator (CNMV) in 2015, and Afi, Spain's leading financial advisory firm.

We invest mainly in Spain, and occasionally in Portugal, in companies that contribute to the SDGs across five themes: good health and well-being; quality and inclusive education; responsible production and consumption; climate action; and social development and integration.

We look for companies that have the potential for long-term growth and scale, a strong management team, an innovative and proven business model, and with the potential for significant positive impact on people, economies and the environment. Our approach to measuring impact is aligned to EVPA's standards.
