Capable of providing all required information that enables to manage all key issues in efficient power management.

SMARTTECH EMS

1. Load Forecasting
2. Supply Forecasting
3. Renewable Forecasting
 - Solar Generation
 - Wind Generation

ENERGY FORECASTING

Products Snapshot

It is a Contract Management and Scheduling Solution which manages the transactions from front-to-back office.

With the focus on the power generation companies, the solution supports management of multiple trades (Long, Medium & Short Term) and provides complete power scheduling across system operators in multiple markets (Bilateral & Power Exchanges).

PTS GENCO

Our RealGen software is an integrated solution which helps power generating companies in load balancing, managing power schedules, maximizing revenues and avoiding grid penalties. Some of the thermal generating stations are able to reduce the DSM penalties and maximize the revenue under DSM limits after implementation of RealGen Software.

REALGEN SOFTWARE

This software is used for Regional Energy Accounting. It processes 15-minute basis schedule as well as meter data and generates several energy accounts like Regional Energy Accounts (Provisional/Final), Deviation Settlement Account, Reactive Energy Account, Congestion Charge Account and Reserves Regulation Ancillary Services (RRAS) Accounts.

ENERGY ACCOUNTING

Integrated Software Solution for Scheduling, Accounting, Metering & Settlement of Transaction under SAMAST Software.
