

.Kreate

Advisory

**Fuelling
Change**

We provide solutions to help clients assess the viability of new projects, evaluate process technology options and optimise design solutions. We also provide operational support, procurement and full project management services.

One of our key strengths is the ability to combine our expertise across a wide range of industrial sectors as well as within multiple disciplines including market, technical, environmental, commercial and financial aspects to provide comprehensive services that are fully tailored according to our client's requirements. Along with that, we also provide merger and acquisition services to our clients.

Strengthening trust

At **.Kreate Advisory**, we believe in working with our clients in an embedded manner to truly make an impact within the DNA of our partner brands. We are a strong team of experienced consultants with deep insights across various sub verticals and job roles in the industry.

Smoothing conversations

Accounting for success

Financial advisory

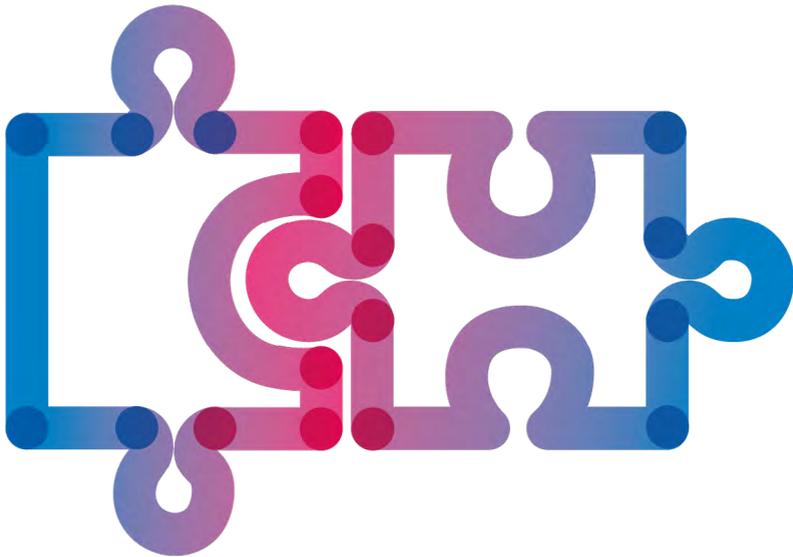

Financial modeling in the power industry demands rethinking. We are involved in reshaping financial planning in the power industry. We provide a platform that empowers our clients to take the right decisions as far as accounting is concerned.

We have a wide range of experience in the areas of investment advisory, project Finance, Financial analysis, financial modeling, Mergers and Acquisitions, Commercial and Financial Due Diligence, Project Restructuring to Policy Reform for the infrastructure sector with a focus on Energy. Our integrated business model increases capital efficiency. We are able to offset project equity requirements through economic benefits generated by our EPC (Engineering Procurement Construction) and O&M businesses. Coupled with our asset financing strategy, we are able to optimise the overall cost of capital leading to enhanced economics for our customers and shareholders.

To enable rapid operation of projects, we use short term credit facilities that are refinanced with long term project finance facilities. Our strong track record and relationships with funding and donor funded agencies offer us significant advantages when it comes to posting capital for bids.

Bridging need gaps

Technical advisory

Our sound technical team provides all it takes to plan and implement a project that can positively impact ecosystems. With our updated knowledge base and experience in the sector, we work closely with our clients to emerge with breakthrough solutions.

We transform project ideas into draft project layouts and thoroughly test the feasibility of concepts. Further, we investigate technical feasibility and financial viability to provide the basis for potential project funding commitments.

Analysis and concept design

- Market analysis
- Concept studies
- Feasibility studies
- Environmental impact assessments
- Sitting studies and site investigations
- Techno-economic analyses
- Due diligences
- Assistance in verifying master plans
- Integrated infrastructure concepts
- Preliminary design and conceptual engineering

- Construction oversight, site supervision and specialist supervision
- Coordinating commissioning
- Supervising commissioning and trial operation
- Verifying plant output and performance
- Compiling documentation
- Safety analysis
- Coordinating workplace health and safety
- Training of operating staff

Guiding progress

Capacity building and training activities

We believe in the bottom up approach to success. It is critical to build a strong base before envisioning a successful future. We enable this foundation and strengthen capabilities by providing training to our partners. Our series of training sessions play a crucial role in expanding the horizons of our clients and accelerate their growth.

To cater to the industry requirements and make best use of infrastructure and expertise, we have ventured into providing consultancy services in the field of human resources development including training, need analysis, upgradation of training facilities, customised course designs, capacity assessment and evaluation for promotion and recruitment.

We conduct a series of training sessions for Government Ministries and Government agencies in Afghanistan as a capability building exercise on power sector. The project aims to inform key policy makers and administrators in the region on Public-Private mechanisms for attracting and stimulating greater investments in infrastructure projects in the region. The training programs included a series of sessions on project finance, contractual analysis, financing agreements and power purchase agreements.
