

Intelligent Asset Management for Operations And Maintenance By Using Digital Twin Of Railway System

6th September 2022

Dr. Abel Maciel

University College London

Dr. Abel Maciel

Royal Institute of British Architects (RIBA)
Architects Registration Board (ARB)
Engineering Doctorate in Virtual Environments,
Imaging and Visualization (EngD)

Academic positions

Senior Research Associate
The Bartlett Faculty of the Built Environment
University College London
Hyperledger Academic Partner at UCL
Frontiers Expert and Editor

Research collaborations

Architectural Association - London
Ecole Spéciale d'Architecture (ESA) - Paris
University of Nottingham
University of Sydney
The Alan Turing Institute

Design Computation Knowledge platform

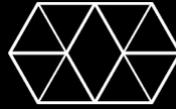

Director of Construction Workgroup

Peer-Reviewer SIGGRAPH

DESIGNCOMPUTATION.ORG

BIM Management and Coordination Advancements

- More Complex
- Higher Quality
- More Predictable
- Less Risky

Construction Blockchain Consortium

Knowledge Transfer

To track and distil emerging technologies for construction.

Research & Development

To build pre-competitive proof-of-concept and generate IP.

Education & Training

Enhancing and re-skilling professional staff required to deploy the new technologies.

UCL believes the most effective way to do this is a knowledge transfer and R&D consortium.

Digital Practice

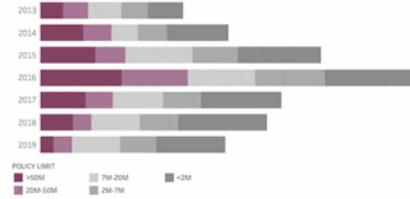

- Systems thinking
 - Processes, people and tools
 - Systems Approach to Infrastructure Delivery (SAID)
- Transparent Processes
 - Breaking away from data silos
- Federated Workflows
 - Close-coupling teams and organizations
 - Real-time feed-back loops
- Long-Term Vision
 - Data Quality and Value
 - Data Provenance & Legacy

INSURANCE CLAIM DETAILS

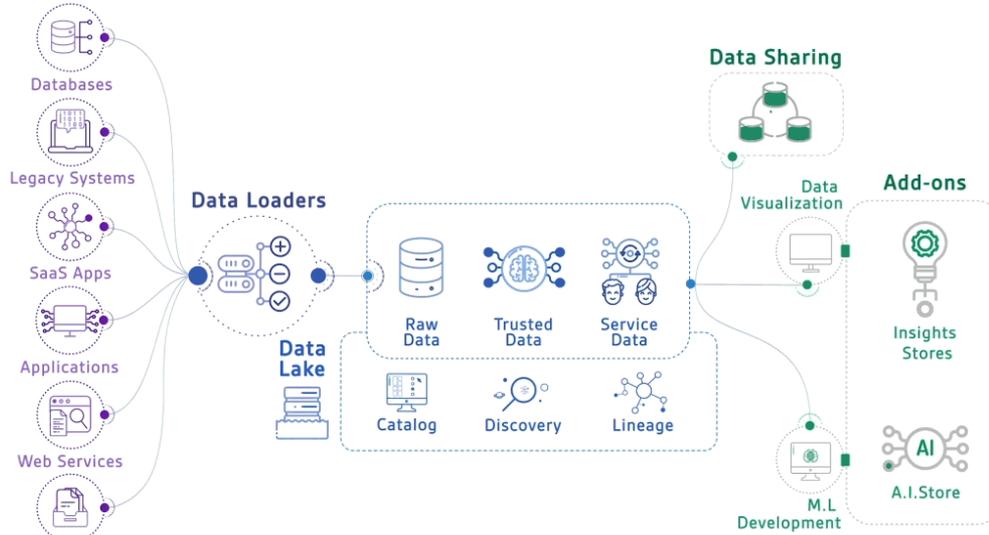

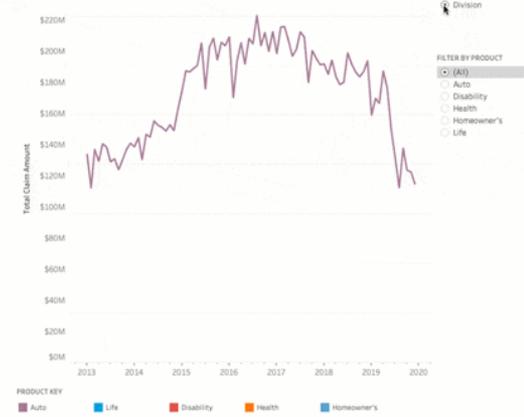

TOTAL PAID BY PRODUCT LINE

TOTAL PAID BY POLICY LIMIT

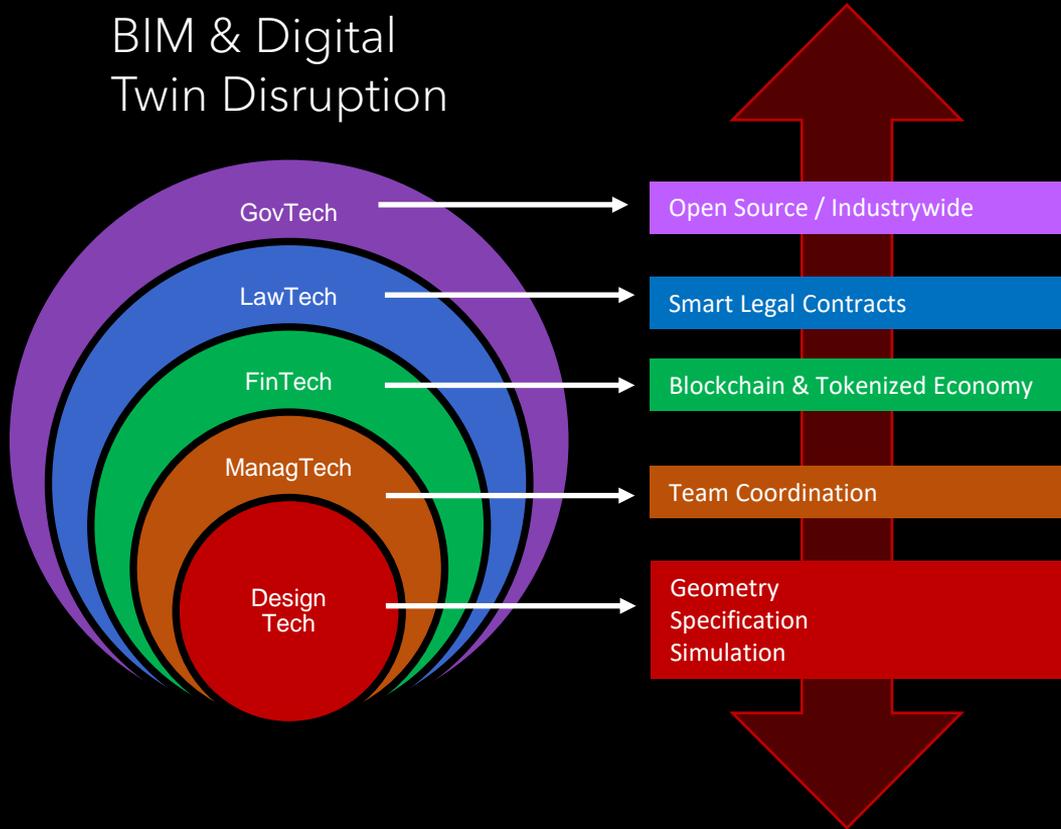

CLAIM TRENDS

The Blockchain Foundation Layer

BIM & Digital Twin Disruption

- Traceable SoS for the Built Environment
- Better Governance in BIM, Digital Twins and Reality Mesh
- New models for networks of value

Smart Legal Contracts

Properties:

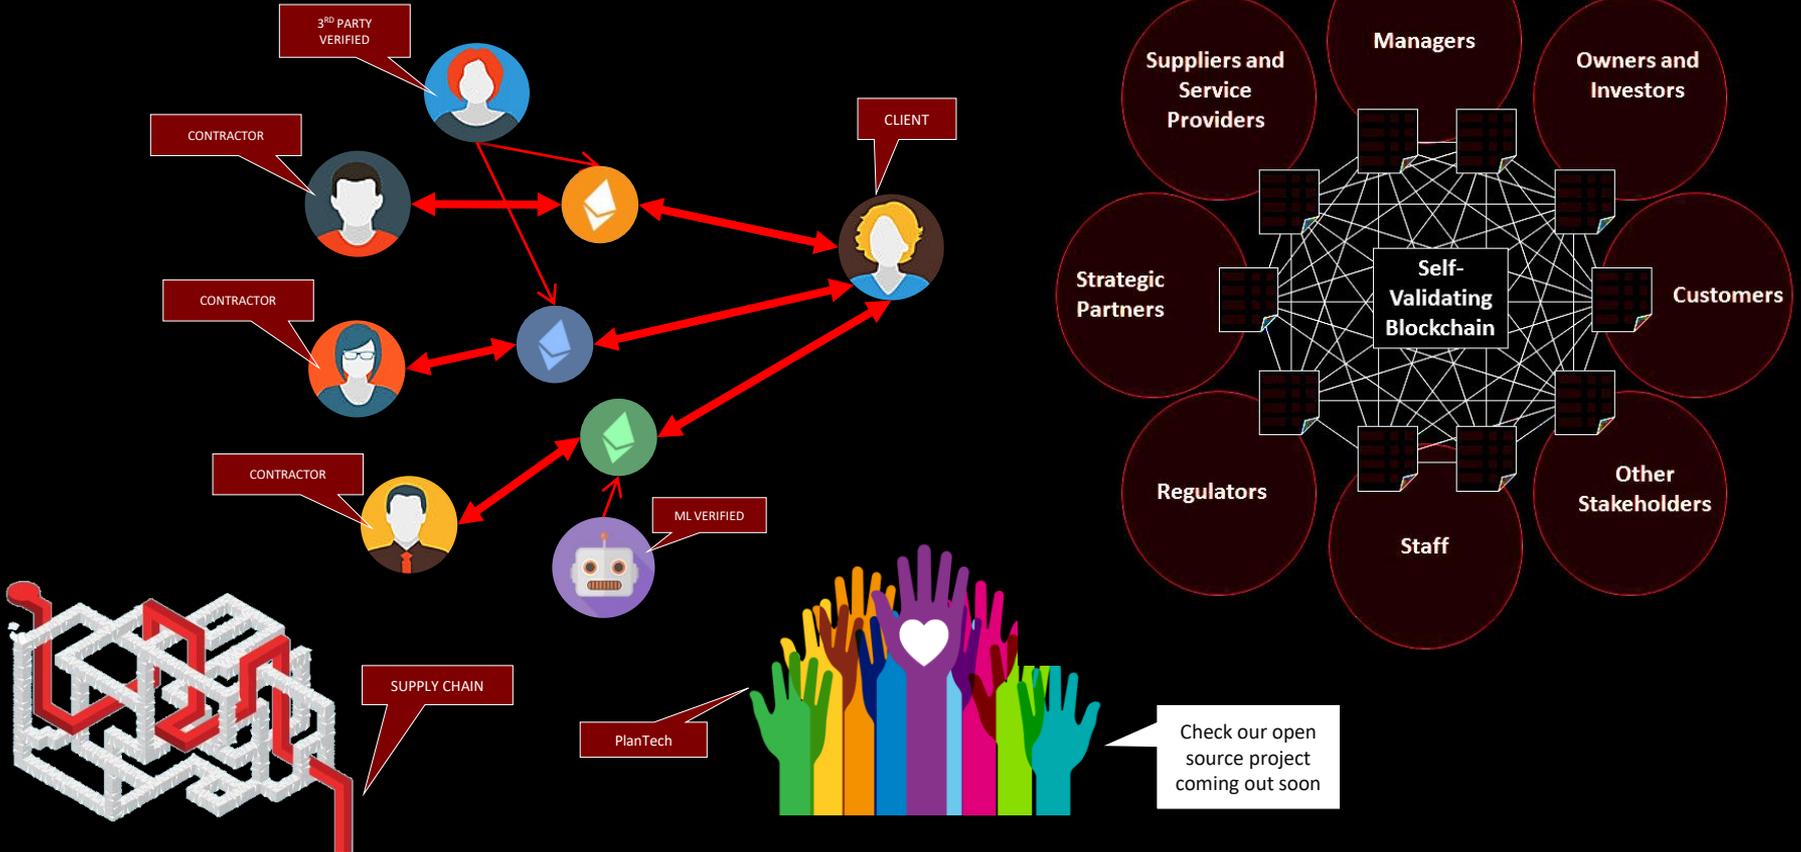

- Automated
- Pro-active (vs. reactive)
- Resilient
- Auditable
- Intelligent

Implications:

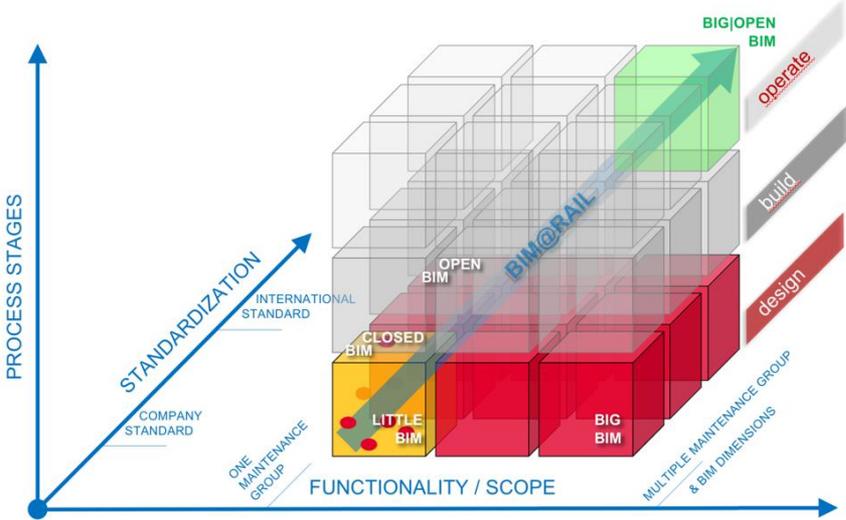

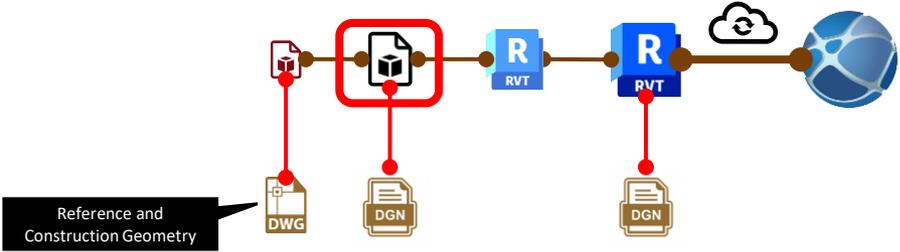

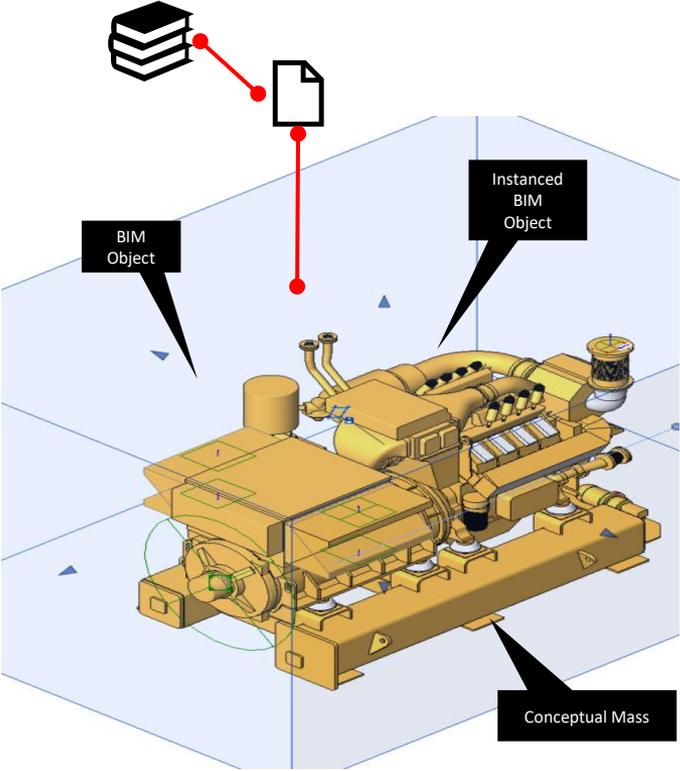

- Untested
- The promise of unforeseen efficiencies in many industries
- A foundation technology for the intelligent environments
- Eradication of corruption
- Transparent global development

Smart Legal Contracts

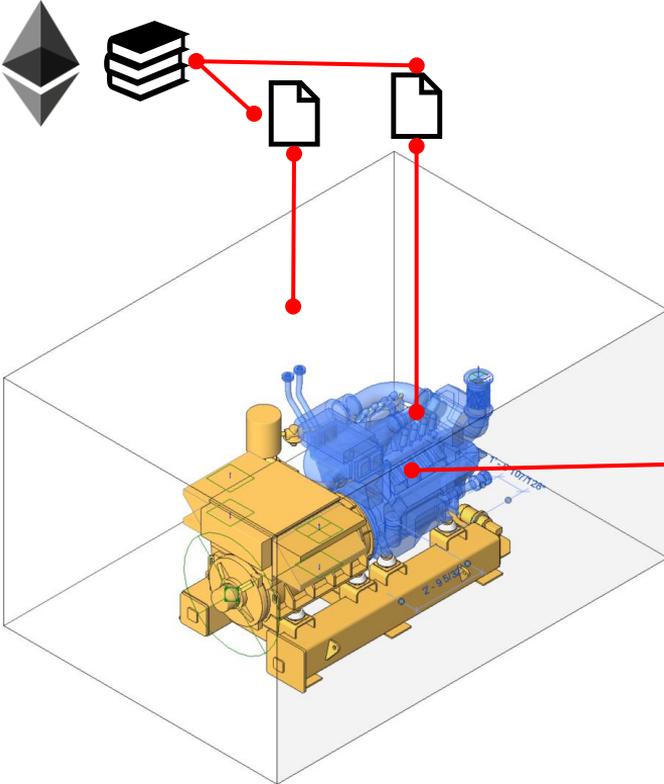

A sovereignty Accountability chains

Enterprise Smart Asset Management

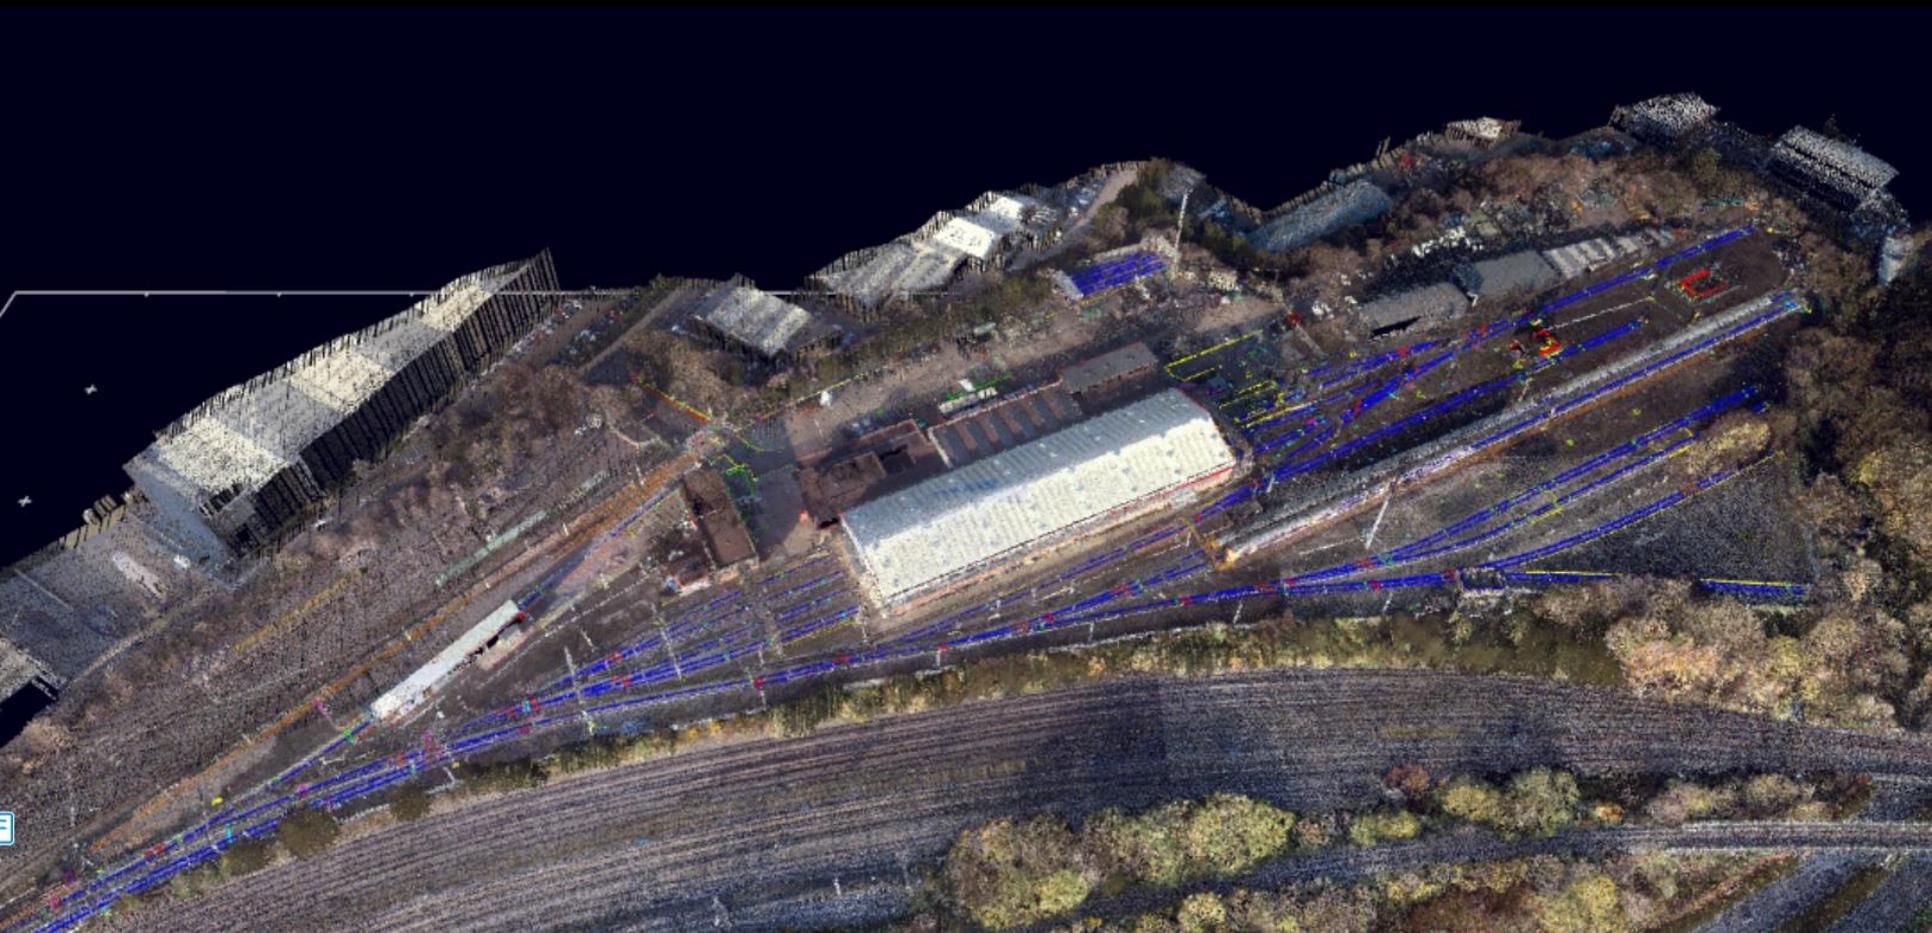

- From Business Case to Domain specific use cases
- Consider IDM Frameworks for the specific industry
- Exchange requirement as links between process and data
- Layer of Exchange
 - Ontologies
 - OTLS vs ABS
 - IFC extensions for multi-verticals
 - Asset Foundation Layers
- Many industries still do not have a plan.

- Leveraging the Scientific Method For Architecture
 - Cognition and Choice Modelling
 - Human factors and Virtual Environments
